EDUCATION

Symbiosis Institute of Technology
B.Tech – Computer Science and Engineering

Nagpur, Maharashtra
2022 – Expected 2026

Dinanath High School and Junior College
Higher Secondary School (HSC)

Nagpur, Maharashtra
2020 – 2022

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL, C

AI/ML & Data Science: TensorFlow, Keras, Scikit-learn, XGBoost, SHAP, Pandas, NumPy, NLTK, GenAI, LLMs (Gemini), NLP, Computer Vision

Web Development: Streamlit, React.js, Node.js, Express.js, HTML, CSS, RESTful APIs

Databases & Tools: MongoDB, PostgreSQL, Supabase, Git, GitHub, Linux, Postman, VS Code

Core Concepts: Data Structures & Algorithms, DBMS, OOP, OS, Computer Networks

EXPERIENCE

Baseraa

Jan 2026 – Present

AI Intern

Bangalore (Remote)

- * Spearheaded a **Financial Engine** and **Automated Valuation Model (AVM)**, enabling landlords to calculate ROI, rental yields, and property valuations instantly.
- * Formulated advanced **mathematical models** synthesizing market inputs—rental laws, sales regulations—into accurate valuation metrics, laying the pipeline for future **ML integration**.
- * Delivered a successful **MVP demo** to founders within the first month, validating the product roadmap and greenlighting full-scale development.

PROJECTS

MindMentor – AI Adaptive Learning Platform | *Gemini 2.5, XGBoost, Streamlit* |

- * Engineered a **GenAI-powered tutoring system** personalizing JEE prep by dynamically adjusting difficulty using **Google Gemini 2.5** with aggressive **LLM caching** to reduce latency and API costs.
- * Built an analytics engine using **XGBoost** and **SHAP** to visualize learning gaps, powering a custom **spaced-repetition algorithm**; projected **>80% cache hit rate** across full syllabus.

GutHeart – Explainable AI Diagnostics | *Scikit-learn, SHAP, Streamlit* |

- * Built a diagnostic framework predicting cardiovascular disease risk from gut microbiome data using **Random Forest** and **Gradient Boosting**; applied **SHAP** for clinically interpretable insights.
- * Validated efficacy through rigorous testing, resulting in a **published IEEE conference paper**; deployed a fully interactive real-time inference interface.

Claims Description Normalizer – Custom NLP Engine | *Python, NLP, Streamlit* |

- * Developed a **proprietary NLP architecture** from scratch to map unstructured insurance claims to standardized categories—zero LLM dependencies, ensuring **zero inference costs** and full data privacy.
- * Deployed an interactive **Streamlit** interface for real-time audit and validation, streamlining the **data pre-processing pipeline** for downstream insurance analytics.

PUBLICATIONS

- **Gut Microbiome-based Cardiovascular Prediction using Random Forest Model**  — *IEEE CISCON 2024*. Demonstrated Random Forest models predicting cardiovascular risk with high accuracy from metagenomic data.
- **Evaluating Generative Models: A Review of Challenges and Opportunities**  — *IEEE ICCT 2025*. Comprehensive review on GANs critically analyzing assessment metrics and key challenges in generative model evaluation.

CERTIFICATIONS

ServiceNow: Certified System Administrator (CSA) **ServiceNow:** Certified Application Developer (CAD) **Red Hat:** RH124 System Administration I 9.0

Oracle Academy: Java Fundamentals **Oracle Academy:** Database Foundations **Infosys:** Java Programming Fundamentals **Infosys:** Big Data L201
